Metra System Map (Fall 2018)

FALL 2018 COMMUTER RAIL SYSTEM WEEKDAY STATION BOARDING/ALIGHTING COUNT SUMMARY RESULTS

This report summarizes results of the Metra station passenger boarding/alighting count taken during the fall of 2018, and is intended as a companion to the separate train count tabulations report.

Metra uses several primary data sources to measure commuter rail ridership. Passenger travel by month is estimated on the basis of ticket sales. Standard trip-rate factors are applied to sales of each ticket type to convert ticket information to passenger trips. Since this data is collected at the fare zone level, it is possible to determine where travel has been made, but not when. Another source is conductor passenger load counts of trains entering and leaving downtown stations. This information serves to measure when passenger travel occurs, but not where. To answer the question of where and when Metra service is used, a census of an entire rail line's ridership for a given weekday is taken on a periodic basis. This Fall 2018 count is the most recent such census.

This 2018 project involved use of survey personnel positioned at the entranceway of each revenue car, or on station platforms if more efficient. Weekday counts were performed on Tuesdays, Wednesdays, and Thursdays in September and November and on Mondays, Tuesdays, Wednesdays and Thursdays in October. Counters recorded the number of passengers boarding and alighting from Metra trains at each station stop on pre-coded forms that were later keyed and computer processed.

The Fall 2018 Commuter Rail System Weekday Station Boarding/Alighting Count (2018 count) was managed by an outside contractor, who was responsible for recruiting, training, scheduling, and supervising count personnel, and for data entry. A detailed examination of the 2018 count by the contractor and Metra staff led to recounts being made on a few trains. Metra staff analyzed and tabulated the final data.

For the 2018 count, trains were counted on these dates:

<u>Line</u>	<u>Abbr.</u>	<u>Count Dates</u>
Metra Electric	ME	10/22 through 10/25
Rock Island	RI	10/9 through 10/11
SouthWest Service	SWS	9/13
Heritage Corridor	HC	9/11
BNSF	BNSF	10/15 through 10/18
Union Pacific West	UP-W	9/25 through 9/27
Milwaukee District West	MD-W	11/7
Union Pacific Northwest	UP-NW	10/2 through 10/4
Milwaukee District North	MD-N	9/18 through 9/19
North Central Service	NCS	9/12
Union Pacific North	UP-N	10/29 through 10/30

Overall, the accuracy of the information was judged good for the specific day(s) of each line's count. However, the validity of the counts as being representative of how riders "typically" use the service is somewhat more difficult to gauge. A one-day count, as opposed to averages derived from multiple observations, is more susceptible to random variations due to factors like weather, traffic conditions, day of week, and time of year. Given that no other data source presently exists which breaks passenger use down to the station stop/train level, most users of this report will need to assume that the data is representative of ridership patterns.

System counts of similar coverage have been taken previously, including Spring 1983, Spring 1985, Fall 1987, Fall 1989, Fall 1991, Fall 1993, Fall 1995, Fall 1997, Fall 1999, Fall 2002, Fall 2006, Spring 2014, and Fall 2016.

The summary count results in this report are organized according to six topical areas. A listing of each exhibit is provided below, including a short description of table format and content.

**Exhibit I
Rail Line Ridership Statistics**

Ia. Line Boardings by Distance from Downtown page 1

Provides rail line boardings aggregated by distance from downtown for 2016 and 2018.

Ib. Total AM Boardings by Area and Rail Line page 2

This table summarizes boardings on inbound trains arriving, and outbound trains departing, downtown terminal stations between the start of service and 11:59 a.m. Line counts are arrayed according to nine geographical areas based on station location. This exhibit is intended to provide a general correlation between commuter rail use and area of residence.

Ic. Weekday Ridership Statistics by Rail Line page 3

Provides rail line ridership figures according to three measures, including: total passenger trips, intermediate passenger trips (i.e., trips beginning and ending outside of downtown), and passenger miles (i.e., combined distance of all passenger travel). For each measure, breakdowns are provided by direction of travel and time-of-day. Criteria for time-of-day are based on the following table:

	Inbound Trains Arriving Chicago	Outbound Trains Departing Chicago
AM Peak	Start of Service - 9:15 a.m.	Start of Service - 9:15 a.m.
Midday	9:16 a.m. - 3:29 p.m.	9:16 a.m. - 3:29 p.m.
PM Peak	3:30 p.m. - 6:45 p.m.	3:30 p.m. - 6:45 p.m.
Evening	6:46 p.m. - End of Service	6:46 p.m. - End of Service

**Exhibit II
Weekday Station Boardings and Alightings** pages 4-10

This table summarizes the total number of passengers entering and leaving stations by direction of travel. Also included are the total AM boardings for each station, that is, all passengers boarding a train from start of service day until 11:59 a.m. The table also includes the rank of outlying stations (i.e., Metra stations located outside of downtown Chicago). For stations that are served by multiple lines, the rank is based on the combined Metra ridership.

**Exhibit III
Weekday Station Boardings Over Time** pages 11-16

This exhibit includes station results from thirteen counts conducted since 1983. Stations are listed by rail line in descending mile post order. Counts for stations closed over this period are also provided.

Exhibit IV
Weekday Station Boardings and Alightings by
Time-of-Day and Direction pages 17-22

This table breaks down Fall 2018 station ridership by time-of-day and direction of travel.

Exhibit V
Non-Downtown Metra Stations Ranked by Total
Weekday Boardings pages 23-25

Stations are ranked in descending order of total Fall 2018 Metra boardings. Stations served by more than one line are ranked according to the combined Metra ridership.

Exhibit VI
Downtown Stations

Vla. Downtown Station Boardings Over Time page 26

Boardings over time are presented for each of the five downtown stations, including breakouts by rail line.

Vlb. Downtown Station Boardings and Alightings
by Service Period page 27

Fall 2018 downtown station ridership is presented by time-of-day and direction of travel.

Note: This list ranks Metra's 236 non-downtown full-time stations. Metra counts Clybourn, Joliet, and Vermont St./Blue Island stations as two stations each due to the separation of the tracks and platforms for multiple service lines. On this list, they and their boardings are combined for ranking purposes for a total of 233 station rankings.
