RE: 19-FOIA-211 Hazel Crest Station Rehab Info

Dear Mr. Haley:

We are in receipt of your request for information pursuant to the Illinois Freedom of Information Act, 5 ILCS 140/1 *et seq.*

On July 29, 2019, we received your request for information regarding the rehabilitation of the Hazel Crest Station Project on Metra's Electric District Line. Specifically, you requested that Metra provide a breakdown of the monetary amount that was paid to Royal Crane, or any other entity performing Operating Engineer class work on the Hazel Crest Station rehab project ("**Request**").

In response to your Request, Metra's Engineering department is providing the following information concerning the monetary amounts paid to entities performing operating engineering work on the above-referenced project:

- \$345,000.00: earned by Stalworth Underground, LLC; \$310,500.00 paid after retainage;
- \$65,450.00: earned by Dupage Topsoil, Inc.; \$58,905.00 paid after retainage;
- Additionally, there was money paid under Contract Modification #1 for temporary ramp access for Dupage and Bowa: Total Contract Modification #1 \$191,871.00 earned Dupage/Bowa; total after retainage \$172,683.90.

After performing a diligent search of Metra's records, we have been unable to locate any records responsive to your Request regarding Royal Crane. Metra's Engineering department advises that Royal Crane was not a subcontractor listed on pay applications and only operated equipment employed by the contractor or their subcontractor.

Sincerely,

Kathleen E. Haton
